By CAROLINE PICHLER. (From the German.) 3 vols. 31s. 6d.

The TRUST: an Autobiography.

By JEAN LE PEUR. 3 vols. 31s. 6d.

"To write a purely domestic tale which is so far from dull is a considerable achievement. Each of the characters has a strongly marked nature of his or her own. Becky Wilson is a fine portrait which must clearly be from life. But the book should be read."—*Athenaeum*.

"The authors of this little volume have attempted a laudable innovation on the customary type of sermons..... Everything, of course, in such a mode of address, must depend upon the manner in which the design is carried out, and of this we can speak very highly. The incidents are well told, the moral of each is well pointed, and the style is correct and lively..... Everyone will find pleasure and instruction in reading them, and we cordially recommend them to the attention of the public."—*Times*, August 5, 1877.

"It will be found to contain a tolerably complete general view of the present state of knowledge of African geography; the natural features of the continent, its many kingdoms, states, and colonies, with their inhabitants, are concisely described, as well as the productions and legitimate commerce of its various regions, and the roots and branches of its great malady, the slave-trade, which affects it so deeply in every part."—*Extract from Preface*.

BRITISH MANUFACTURING INDUSTRIES. Edited by G. PHILLIPS BEVAN, F.G.S., &c. A Series of Twelve Handy Volumes, each containing Three or more Subjects by Eminent Writers. And the Two Supplementary Volumes on the INDUSTRIAL CLASSES and INDUSTRIAL STATISTICS. By G. PHILLIPS BEVAN, F.G.S. With Maps.

"The idea of publishing, in the same form of volume, a number of essays on British Industries, which should be from the pens of men whose positions are a guarantee for the correctness of the descriptions given and of the facts detailed, is certainly a good one. A large number of people desire to possess a general acquaintance with those industrial operations which have for a long period distinguished this country, but they have not the time, or the opportunity, or perhaps the industry for hunting out the details of them which are probably scattered through numerous books and journals. For this class these books appear to us to be exceedingly well adapted. . . . We recommend the essays to the attention of all who desire to know something of the industries of which they treat. . . . The impression left after a careful examination of each of the subjects dealt with is most favourable."—*Athenæum*.

RECREATIVE INSTRUCTION.—Pictorial Lessons on Form, Comparison, and Number. For Children under Seven Years of Age. With Explanations by NICHOLAS BOHNY.

FROM THE TIMES.—"It is most desirable that young people should become acquainted with the natural objects around them without a laborious study of natural history. A shrewd author, who, many years ago, published a work on etiquette, seriously advised his readers, in order to become adepts in carving—then a more important art than it has since become—to take a few lessons in anatomy. His advice was evidently absurd, and yet not more so than that given to young people when they are told to read heavy books on natural history for information concerning the animals and plants most useful or most dangerous to man, or most generally met with in their own country. Few children can afford time to read much on such subjects, but all may profitably turn over a picture book and learn from it what is the appearance of the natural objects which are most frequently spoken of in daily conversation by the poets and the writers of apologue. We live now more in towns than we did, and all of us are, more or less, 'cockneys,' knowing much less of nature than our fathers. Many of us come to maturity without knowing, to take one instance, what is the difference between the jackdaw, the raven, the rook, the chough, the carrion crow and the hooded crow, and yet all these are English birds, to each of which a thousand associations are attached. We may see these animals in a museum, no doubt; but they are buried among an infinite variety of kindred species, and they are seen but for a moment and under a glass, so that in general we carry away with us but a faint impression of their appearance. A picture-book supplies a better means of recognising them and imprinting their forms on the memory; but then the selection of animals must be carefully made, and the drawing and colouring must be true to nature. The objects representing must be those we are most likely to hear of, and the pictures should be so faithful that we can be at no loss in identifying the objects when we see them. All this has been accomplished most admirably in the series of 'Instructive Picture-Books' referred to. These volumes are among the most instructive picture-books we have seen, and we know of none better calculated to excite and gratify the appetite of the young for the knowledge of nature."

FIVE-CHIMNEY FARM. By Mary A. M.

HOPKINS. 3 vols. crown 8vo, 31s. 6d.

".... We are only too speedily taken across the Channel to Paris, where things are hastening towards the Revolution.... Contrasts and transitions of this kind, when judiciously managed, must always be effective, at all events when the talent of the author is so versatile as that of Miss Hopkings.... Miss Hopkings often reminds us of the author of 'Alice Lorraine.'"—*Saturday Review.*

"It is both pleasant and powerful."—*Pall Mall Gazette.*

THE VOYAGE of the "CHALLENGER."

The ATLANTIC.—An Account of the General Results of the Voyage during the Year 1873 and the early part of the Year 1876. By Sir C. WYVILLE THOMSON, F.R.S. With a Portrait of Author, engraved by C. H. Jeens, many Coloured Maps, Temperature-Charts, and Illustrations engraved by J. D. Cooper, from Drawings by J. J. Wyld. 2 vols. medium 8vo, 45s.

The *Times* says:—"It is right that the public should have some authoritative account of the general results of the expedition, and that as many of the ascertained data as may be accepted with confidence should speedily find their place in the general body of scientific knowledge. No one can be more competent than the accomplished scientific chief of the expedition to satisfy the public in this respect.....The paper, printing, and especially the numerous illustrations, are of the highest quality.....We have rarely, if ever, seen more beautiful specimens of wood engraving than abound in this work.....Sir Wyville Thomson's style is particularly attractive; he is easy and graceful, but vigorous and exceedingly happy in the choice of language, and throughout the work there are touches which show that science has not banished sentiment from his bosom."

By the same Author, uniform with the above.
